SUMMARY

Informatics Engineering graduate with hands-on experience in designing, developing, and maintaining cross-platform mobile applications using Flutter and Kotlin. Experienced in delivering production-ready mobile solutions through internships, professional development programs, and government digital transformation projects. Strong understanding of RESTful API integration, mobile application architecture, state management, and collaborative software development within Agile environments. Passionate about building scalable, maintainable, and user-centric applications while continuously learning emerging technologies to solve real-world problems.

EDUCATION

Universitas Mikroskil

September 2021 - October 2025

Informatics Engineering | GPA: 3.86/4.00

WORK EXPERIENCE

Dinas Komunikasi dan Informatika

Juni 2026 – Present

Mobile Developer

- Develop and enhance Super App Sumut Cerdas, a government digital services platform built with Flutter, delivering integrated mobile solutions that improve accessibility to public services for citizens.
- Implement scalable application features by integrating RESTful APIs with backend services, ensuring reliable authentication, data synchronization, and seamless communication between frontend and backend systems.
- Collaborate closely with backend developers, UI/UX designers, QA engineers, and project stakeholders throughout the software development lifecycle, from requirement analysis to deployment and maintenance.
- Optimize application performance, troubleshoot production issues, and continuously improve code quality by applying Clean Architecture principles, state management, and best development practices.

PT Media Antar Nusa

December 2025 – Juni 2026

Mobile Developer (Internship)

- Developed a multi-tenant electronic signature mobile application using Flutter, enabling secure digital document management through seamless integration with Laravel-based backend services.
- Implemented authentication mechanisms, role-based access control, and digital signing workflows to support secure and efficient user interactions.
- Collaborated with backend engineers to integrate KYC verification, document validation, and secure data processing features while ensuring compliance with business requirements.
- Contributed to debugging, feature enhancements, API integration, and application testing, improving overall application reliability and maintainability within an Agile development environment.
- Worked with Git-based version control and participated in daily stand-up meetings, sprint planning, and collaborative code review sessions.

Studyo

September - November 2025

Mobile Developer (Remote Internship)

- Migrated an existing Flutter mobile game into a Flutter Web application, enabling browser-based deployment while preserving gameplay functionality and performance.
- Optimized rendering behavior, asset management, and platform compatibility to deliver a consistent user experience across mobile and web environments.
- Collaborated remotely with the development team to resolve platform-specific issues, maintain feature parity, and improve application responsiveness.

PROFESSIONAL DEVELOPMENT

Mobile Apps Developer

February – July 2024

Mojadi App Indonesia

- Built a healthcare mobile application named Sicare using Flutter as part of an intensive mobile application development program.
- Developed role-based functionalities, appointment scheduling features, and interactive user interfaces focused on usability and performance.
- Applied software engineering best practices including Git version control, API integration, debugging, and collaborative project development.

Mobile Developer

August 2023 – January 2024

Bangkit Academy by google

- Successfully completed Google's intensive Mobile Development learning path, focusing on Android application development using Kotlin and modern Android architecture.
- Developed Android applications by implementing object-oriented programming principles, UI design best practices, networking, and local data persistence.
- Collaborated in a multidisciplinary capstone project with Machine Learning and Cloud Computing cohorts to develop an AI-powered mobile solution for real-world use cases.
- Strengthened technical and professional competencies through project-based learning, Agile collaboration, version control using Git, and regular mentor evaluations.

SKILL

Language

- Indonesian (Native)
- English (Intermediate)

Technical Skill

- Programming & Development: Dart, Flutter, RESTful APIs, BLoC, Clean Architecture, PHP, Laravel, JavaScript
- Tools & Platforms: Git, GitHub, GitLab, Android Studio, VS Code, Postman, Firebase, Docker, Jira

Soft Skill:

- Analytical Thinking, Project Management, Attention to Detail, Creativity, Leadership, Communication, Problem Solving, Adaptability, Ability to Work Under Pressure, Teamwork, Time Management.
